Brake/Clutch Bleeder 12V

A portable, self contained, pressurised brake bleeder which is powered from the vehicle's 12V battery - the output pressure is adjustable up to a maximum of 36psi (2.5 bar). Suitable for professional workshop use and can also be used on hydraulic clutch systems.

Additional Information

- Made from a stainless steel case with a reservoir tank that has a 5 litre capacity which enables the entire braking system fluid to be replaced in one fill without the risk of the reservoir running dry.
- The internal pressure pump is conveniently powered from the vehicle's 12V battery. Pressure adjustable up to 36psi (2.5 bar).
- Supplied with catchment bottle and a syringe to remove old fluid and to help set the level.
- Suitable for both hydraulic brake and clutch systems.
- Supplied with a 44mm European brake fluid reservoir adaptor. Cap kit available, please see Laser Part No. 7101.
