

Radlagerset 82 mm Ford

Generation II (GEN2) type wheel bearings consist of a combined bearing and drive flange (hub), which cannot be separated, therefore require special tools for both removal and fitting of new bearings. The Laser Tools range includes a number of individually sized kits, along with upgrade kits to allow for expansion of applications to different sized bearings, without always having to purchase complete new kits for each bearing size. By using clamshells and force plates and pins, this tool ensures that the load is taken only on the outer race of the bearing. The kits are also designed to allow for extraction of the relevant bearing, without removing the ABS Sensor.

Additional Information

- Fahrzeugmodelle: Ford Focus , /Focus II.5RS/ Focus 2.5rs 500/mondeo4
- für Radlager Generation 2
- Ford Mondeo MKIV aus 2007, Galaxy aus 2006, S-Max aus 2006 Front.
