

Belt Type Oil Filter Wrench 65 - 105mm

A belt type oil filter wrench designed to remove filters without damage. The wrench handle has a twist lock adjustment mechanism for fast, easy removal of oil filters from 65mm to 105mm. The comfortable, soft grip handle is 160mm long for decent leverage and the strap has a dimpled surface for grip. The metal strap is only 0.5mm thick, ideal when space is restricted. A simple and effective tool for oil filter servicing.

Additional Information

- Adjustment range: 65 - 105mm.
- Belt thickness: 0.5mm.
- Soft grip, twist handle for fast size adjustment.
- Designed to remove filters without damage.
