## LASER®

## **Oil Filter Chain Wrench - for HGV**

Strong, double width chain wrench with handle designed for heavy duty applications, including HGV use. The double-link chain construction provides plenty of strength and grip, even on oily surfaces and long length will fit a wide range of canister-type filters from 60 – 160mm diameter. The handle is 350mm long, perfect for extra leverage when removing stubborn filters and the cranked swivel design is useful when access is restricted. All-in-one wrench and handle design, unlike traditional chain wrenches there is no need for a separate ratchet or power bar, a really useful tool for the HGV workshop.

## **Additional Information**

- Large size designed for HGV use, fits filters from 60-160mm diameter. Chain length: 520mm.
- Double-link chain construction for extra strength and grip.
- For the removal of canister-type filters.
- Long handle, 350mm for extra leverage.
- · Cranked swivel handle for flexible use in confined areas.
