

Flaring Tool 10pc

The flaring tool kit contains everything necessary to produce male and female flares easily and consistently. The kit includes a flaring clamp, die holder, a set of seven dies and a tube cutter. The dies are machined to tight tolerances and grip the pipe tightly to ensure accurate flaring. The kit is simple to use either on a vehicle or in a bench vice. It is suitable for cutting and flaring copper, brass and thin walled aluminium tubing and is ideal for making custom fit replacement brake pipes. A quality set for reliable results. Supplied in a storage case to keep everything safe and organised.
