

Camshaft Locking Tool - for VAG

This revised camshaft setting bracket for VAG vehicles now gives even better alignment with 2 precision ground, shouldered, screws included in the set. This timesaving product from Laser means that the engine timing can be locked with the vacuum pump and cam cover still in place. The camshaft setting bracket can be offered up to the camshaft slot by sliding it along the dowel screws. An additional knob/handle is incorporated in the tool to assist with precision alignment.

Additional Information

- Used on 1.9 TDI engines.
- OEM Refs: MP 1 312, T20038, T10098 and 3418.
- Use on Seat Cordoba, Ibiza, Inca, Leon and Toledo (1999-2006). Please see 'applications' tab below for more fitments.
- Made in Sheffield.
