

Flywheel Locking Tool - for Vauxhall 1.4, 1.6, 1.8

A very simple tool used to lock the flywheel via the starter ring gear which allows the front pulley bolt to be undone without putting unwanted loads on the camshaft locking tools.

Additional Information

- For locking the flywheel when changing the cambelt.
- Equivalent to OEM KM 911.
- For use on the Z14, Z16 and Z18XE Vauxhall engines.
- Made in Sheffield.
