

B

Essential for measuring the cylinder position at TDC on multi-valve engines. The 2mm probe gives access to the piston face which is largely obscured by the valve.

Additional Information

- Essential for measuring the cylinder position at TDC on multi-valve engines.
- The 2mm probe gives access to the piston face which is restricted by the valve.
- Specifically required where no TDC marks are shown.
- Equivalent to OEM 1 895 443 000.
- Use with Laser Part No. 2584 DTI (dial test indicator). Made in Sheffield.
