

Impact Spline Socket Bit Set 1/2"D 6pc

A set of six 1/2"D impact sockets in a range of sizes from M8 to M18. The low-profile is useful when clearance is limited and the bits are impact quality chrome molybdenum for use with air and power tools for the fast, safe adjustment of spline fasteners. The sizes are engraved on the sockets for easy identification and supplied in a rugged metal case with a fitted foam insert to keep the sockets safe and organized.

Additional Information

- 1/2"D socket bits x 40mm long: M8, M10, M12, M14, M16 & M18.
- Impact quality chrome molybdenum with anti-corrosion black phosphate finish.
- Low profile ideal for adjusting spline fixings with limited clearance.
- Supplied in a metal case with fitted foam insert for convenient workshop storage.
- Other sets also available. Please see Laser Part Nos. 6725 (9pc set) and 7979 (dual drive).
