

250mm Oil Drum Funnel With Grill

Robust oil drum funnel with a fixed spout and large capacity (250mm x 200mm) designed for the efficient draining of used oil filters, as well as returning unused oil to the barrel. Features a hinged top lid to prevent contamination, an adaptor and open mesh grill that allows oil filters to drain directly into the drum for faster clean-up. There is a tab handle on the side with a hanging hole for storage and the funnel is made from thick (2.5mm) polypropylene that is oil resistant and PAHS and REACH compliant, ideal for the professional automotive workshop.

Additional Information

- Funnel with lid and filter for oil drum.
- Supplied with grill to allow filters to drain direct into oil drum.
- Supplied with adaptor for oil drums suitable for draining waste oil or draining unused oil into the drum.
- Diameter: 250mm; depth 200mm.
- Manufactured from polypropylene (PP). Conforms to PAHS & REACH.
