

Stretchy Belt Fitting Kit - for Ford & Volvo

A two piece stretchy belt fitting tool, designed to be used where the universal tools will not work due to the double width crankshaft pulley stopping the belt being fitted.

Additional Information

- One part of the tool allows the belt to slide easily over the outer pulley; the other tool allows the belt to be easily rotated into place.
- Applications: Ford C-Max, Focus, Mondeo 1.4 and 1.6; Volvo S40, C30 and V50.
- Manufactured from steel.
