

Tyre Valve Stem Cutting Pliers

A pair of cutting pliers designed for the safe removal of tyre valve stems without causing damage to the wheel rim. They feature a pair of flat-bladed cutting jaws that enable them to fit neatly under the base of the valve, allowing the base to be easily cut from them valve stem. Suitable for use by professional tyre fitters and mechanics.

Additional Information

- Ideal for use in tyre shops, garages & service centres.
- Length: 230mm.
- Maximum opening 30mm x 18mm cutting jaw.
- For replaceable tyre valves see our Connect Workshop Consumable range.
