

Coolant/Radiator Cap Wrench - for BMW

Specially developed for applications where the coolant tank is housed under the bulkhead in a confined area making access for removal by hand difficult

Additional Information

- Applications: BMW.
- Constant heating and cooling in use makes the seals of the cap stick further adding to the removal issue.
- 3/8"D.
- 87mm across the flats. 6 indents, 27mm wide.
- Black phosphate finish.
