

Front Wheel Bearing Overhaul Kit - for Ford Transit

Front wheel bearing and disc removal tool for the Ford Transit (2000-2012) and Transit Custom (2012<). Due to the design of this tool the bearing and disc assembly can be removed in a controlled manner allowing the disc to be separated from the bearing for replacement while saving the bearing for re-use.

Additional Information

- For the removal of the front bearing/disc assembly from the hub and separation of the disc from the bearing.
- Applications: Ford Transit from 2000 to 2012 and Transit Custom from 2012 on.
- For post 2014 Transits use 7122 with 7109 (available separately).
- Utilises a threaded force screw, always use molybdenum disulphide grease (supplied). Replacement Force Screw available – Part No 1727.
- EU Registered Design. Made in Sheffield.
