

Insulated Magnetic Pick Up Tool

A insulated magnetic pick up tool, approved for live working up to 1000V, ideal for hybrid and EV servicing and maintenance. Featuring a compact 5mm magnetic head and 420mm long reach flexible shaft with insulated black/red TPR handle. A useful tool for the retrieval of components and fixings from confined, hard to reach vehicle areas.

Additional Information

- Flexible insulated magnetic pick-up tool for hard to access areas.
- Lifting capacity up to 250g.
- 5mm diameter magnetic head.
- Tool length: 420mm, ideal for deep seated access.
- NOTE: Use with caution. While the operator is fully insulated from the working end of the tool, any metal object being picked up can still short across live circuits.
