

Stainless Steel Drip Tray

Large heavy-duty drip tray manufactured from 2mm thick pressed stainless steel, embossed with the Laser logo and a fully polished finish. Exceptionally tough and strong the tray has excellent resistance to rust, stains, chemicals and corrosion and the base has a 30mm wide channel round the edge for easier pouring. The low profile tray is just 48mm deep, slim enough to slip under the lowest sports car and can also be used with oil absorption pads, please see Part nos. 5712 & 5713. Easy to clean, the tray can tolerate high temperatures so it can be sterilised with heat, making it also suitable for home and kitchen use.
