

Butane Torch - Flexible Head

Butane gas torch with flexible head and two heat level settings. The flexible head offers three operating positions (90°, 135° & 180°) which are adjusted and secured using a click lock mechanism for quick, reliable set up. Features a stainless steel grip with pistol trigger for comfort and ease of use. Comes with some important safety features including a child resistant safety catch and auto turn off when the trigger is released. A quality tool designed for consistent and reliable service.

Additional Information

- Flexible head butane torch with a choice of 3 operating angles: 90°, 135° & 180° allows easy adjustment to the optimal working position.
- Adjustable air intake hole for a hard or soft flame. Ideal for a wide range of soldering, brazing & heat shrinking jobs.
- Piezo ignition allows torch to be lit at any angle.
- Integrated stand, stainless steel grip and safety locking mechanism. Trigger/side lock button for continuous use.
- Uses butane lighter gas or propane mixture (30ml capacity). Temperature range up to 1300°C. CE & UKCA compliant.
