

Oil Filter Strap Wrench - for Trucks

Oil filter strap wrench for larger engine filters, up to 150mm diameter, with a 1/2" square drive for use with a ratchet or power bar. Curved steel support pad and extra wide, 50mm nylon webbing strap to grip the filter without damage. The compact design can be rolled up for easy storage, a simple, effective solution for removing oil filters from trucks and agricultural machinery.

Additional Information

- For filters up to 150mm in diameter.
- 1/2" square drive for use with a power bar or ratchet.
- The curved steel support pad helps to grip the filter without crushing it.
- Larger size suitable for trucks and agricultural machinery.
- 50mm wide nylon webbing strap will not damage the oil filter.
