

Camshaft Locking Blocks - for Ford 1.1

Designed specifically for the very latest 1.1L 3 cylinder normally aspirated petrol engine from Ford, the locking blocks provide the tools required to set and hold the camshafts. Our specially designed EU Registered cam locking blocks offer an easier to use and more accurate method of locking the camshaft than even the OEM tools can offer, ensuring the camshafts are securely locked in position quickly and easily.

Additional Information

- For setting and holding the camshafts in their timed position.
- Application: Ford 1.1 Litre wet belt non turbo engines.
- For use with laser kit 6952.
- For complete 1.1L timing kit please see Laser Part No. 7828.
- EU Registered Design Camshaft Locking Blocks. Made in Sheffield.
