

Tyre Bead Retainer Tool

Tyre bead retainer tool to prevent the tyre bead from slipping when refitting the tyre to the wheel.

Additional Information

- Used to ensure the tyre bead remains under the rim flange while fitting the tyre to the wheel.
- Compact design: 152mm overall length.
- PVC coating prevents damage to rim & provides stronger grip on the rim surface.
- Suitable for on & off road cars, motorcycles & truck tyres.
- Manufactured from 45 carbon steel.
