

Motorcycle Spoke Wrench Set with Torque Wrench

Spoke wrench set with interchangeable spoke wrench heads and an adjustable torque wrench, allowing spokes to be replaced in accordance with the wheel manufacturers specifications and set to the correct torque. All packed in a blow mould storage case with an EVA foam insert.

Additional Information

- Kit includes: Torque wrench 2-7Nm & wrench handle. 9 x interchangeable spoke wrench heads: 5.6, 5.8, 6.1, 6.3, 6.5, 6.7, 6.9, 7.1mm & Spline type.
- Designed to allow the replacement of a wheel spoke & tightening to the correct torque.
- Applications include, but are not restricted to: BMW, KTM, Ducati & Excel Rims.
- Over or under tightening of spokes can easily lead to excessive radial & lateral runout. Always check radial & lateral runout when replacing spokes & set the torque to the manufacturers specification.
- Can be used in conjunction with the Laser Motorcycle Wheel Balancer & Alignment Stand, please see Part No. 8236. Supplied with certificate of conformity.
