

Strut Support for Transmission Jacks

This suspension strut support has been designed for use with a hydraulic vertical transmission jack or gearbox stand, to hold the strut in place whilst working in-situ on the vehicle suspension, preventing it from moving downwards.

Additional Information

- Designed for use with a vertical transmission jack, see Laser Part No. 8655.
- For holding & supporting the MacPherson strut while working on the suspension.
- Prevents the strut from moving downwards.
- Use with transmission jacks fitted with 30mm diameter top shaft.
