

Extendable Flexi Head Ratchet 1/2"D

A telescopic 1/2"D wrench with a flexible ratchet head and ratchet lock-out button, allowing for a greater torque to be applied when loosening stubborn or corroded fixings without causing damage to the ratchet mechanism. The handle has two fixed positions, extending from 455mm to 630mm, and when combined with the flexi head and 72 teeth ratchet mechanism it makes it ideal for use on hard to access nuts and bolts.

Additional Information

- 72 teeth ratchet mechanism.
- Extendable range: 455 – 630mm.
- Flexible ratchet head that features a ratchet lock button allowing more torque to be applied when being used as a power bar.
- Manufactured from chrome vanadium with a chrome plated finish & a knurled grip handle.
- Ratchet repair kit available, Laser Part No. 8513.
