

Air Blow Gun with Rubber Tip

A compact and quiet air blow gun that fits standard air compressors with a 1/4" BSP thread. It features a vented rubber tip/nozzle to protect surfaces from scratches and to prevent the pressure from exceeding 30psi if the tip becomes blocked, making it suitable for tasks such as car cleaning or drying delicate parts. It has a nylon construction with a rubberised trigger for grip and a hanging eyelet for storage, ideal for use in workshops, bodyshops, manufacturing and DIY environments.

Additional Information

- Nylon bodied air blow gun featuring a rubber tip to protect surfaces from scratches.
- Ergonomic handle with soft-touch rubber grip on trigger.
- Thread: 1/4" BSP. For use with Connect parts 30951, 37096 or 30954 air line coupling.
- Max pressure: 235psi (16 bar).
- Meets EU2003/10/CE standards. Max 85dB.
