

Trim Clip Pliers - 80 Degree Offset

A pair of spring-loaded trim clip pliers with a 80 degree offset, for removing push-pin plastic body fasteners with ease and without causing any damage to the fastener or the surrounding trim. The spring-loaded handles and angled jaws allow for one-handed use and easy access in tight spaces.

Additional Information

- Designed for the removal of push pin plastic body fasteners and clips with centre locking pins (including 2 and 4 groove), without causing damage to the pin or body.
- Also allows for the trim clip body to be gently clamped together to aid installation.
- Length: 200mm; Jaw width: 70mm.
- Manufactured from chrome molybdenum, with the spring-loaded handle vinyl dipped for grip and comfort.
- 35 degree offset pliers also available, please see Laser Part No. 8540.
