

Oil Filter Removal Cup Set 2pc

A pair of oil filter removal cups designed to be used in conjunction with an oil filter wrench to undo and remove the filter, eliminating the need for the user to handle the filter and preventing any splashes or spillages of hot engine oil.

Additional Information

- 2 x fluted oil filter removal cups designed to grip a loosened oil filter & unscrew safely from the engine.
- Sizes: 180cc, to fit oil filters measuring 63 & 67mm in diameter; 240cc to fit 73 & 76mm.
- Protects the mechanics hands from heat & splashes of hot, dirty, or contaminated engine oil.
- Helps to catch used engine oil from the filter, preventing any spillages and/or slip-hazards.
- Manufactured from Polypropylene (PP), with a Polyethylene (PE) collar.
