

Deluxe Engine Support Beam 500kg

A heavy duty, fully adjustable, engine support bar with a maximum load capacity of 500kg. It features 4 independently adjustable feet, which are mounted on two 870mm long fore and aft adjustment beams that can pivot on the engine support bar, to position the support hook in the right place with ease. Allows for accurate vertical adjustment via a long threaded bar with large handled wing nut for ease of use. The feet are fitted with rubber ends, to prevent them slipping and/or causing any damage to paintwork, and it is supplied with a 850mm long chain.
