

Impact Universal Joint Set 3/8"D 4pc

A 3/8"D universal joint designed for use with impact wrenches, that features interchangeable drive adaptors in 1/4, 3/8 & 1/2"D sizes that can be locked into the spring-loaded holder with a quick release collar. The 25°~30° working angle and 360° rotation ensures that this swivel socket adaptor is ideal for use on fixings that have very limited access in engine bays and confined spaces.

Additional Information

- 3/8"D universal joint with 3 interchangeable impact drive heads; 1/4, 3/8 & 1/2"D.
- 25°~30° working angle with 360° rotation allows increased access in difficult access locations.
- Manufactured from chrome molybdenum. Max torque exceeds DIN 3123 for drive size.
- Presented in an EVA foam tray (37 x 80 x 150mm) convenient for user storage & limiting packaging waste.
- 1/2"D universal joint set also available, please see Laser Part No. 9049.
