

Battery Terminal & Wiper Arm Puller

Two-legged battery terminal and wiper arm puller, designed to grip under the clamp or wiper arm and pull upwards in a controlled manner while pushing on the wiper or battery post.

Additional Information

- Ideal when working with standard traditional style battery clamps.
- 2 leg adjustable puller with threaded cone to load the grip on the legs.
- Can be used on wiper arms where access permits. Fitted with tightening T-bar (do not extend).
- Manufactured from steel, carbon steel & aluminium.
- NOTE: Always ensure force screw is lubricated with molybdenum disulphide grease prior to use.
