

Wheel Stud Installer Kit 10pc

Vehicle wheel studs wear over time. Every time the wheels come off the car the studs are subjected to the potential for damage due to dirt or over-torquing. The Laser 9185 is a 10-piece kit made up of 4-wheel stud fitting tools including 2 friction reduction washers and 4 thread chasers. Simple to use while ensuring new wheel studs are fitted quickly and correctly without damage.

Additional Information

- For replacing damaged wheel studs.
- Sizes supplied: M14 x 2.0mm, M14 x 1.5mm, M12 x 1.5mm, M12 x 1.25mm.
- Thread chasers supplied for use where studs can be saved without replacing.
- NOTE: Lubricate threaded parts & chaser with grease before use.
- For larger thread sizes please see Laser Part No. 8125, Wheel Stud Service kit for HGV. Supplied in a toolbox friendly engineered EVA foam tray (37 x 140 x 197mm).
