

Oil Strap Filter Wrench - to 120mm dia

This strap filter wrench has been designed to remove oil filters up to 120mm and is particularly suited to accessing awkward areas. The wide nylon webbing strap provides a strong, non-marking grip and the twin head adjuster can be driven by a 1/2"D or 21mm Hex so the strap can be tightened by a ratchet, power bar or spanner. A simple, cost-effective solution for removing stubborn oil filters.

Additional Information

- Strap filter wrench for the removal of oil filters, up to 120mm diameter.
- Designed to be used with a 1/2"D ratchet, power bar, extension bar or 21mm spanner.
- Wide nylon webbing strap (25mm) for increased grip.
- Adjustment head manufactured from durable carbon steel in a satin finish.
- Other strap wrenches also available. Please see Part Nos. 0237 (Heavy Duty) & 2104 (300mm diameter).
