

Tool Box - 7 Tray 425mm (17")

Shorter version of the 7 tray tool box, ideal for storing a large number of smaller hand tools. The six cantilevered trays open fully, allowing tools to be organised, making them much easier and quicker to find compared to a single compartment tool box. The base compartment has room to fit larger tools and the six cantilevered trays offer plenty of options for tool organization. One of the top trays has a divider making it ideal for smaller items. The sturdy twin handles interlock keeping the tool box firmly closed and spreading the load evenly when carrying. The lid includes a padlock hole for extra security (padlock available separately). This robust tool box is made from heavy gauge steel and painted in a tough bright red finish. A great toolbox for the DIY enthusiast and professional tradesperson alike.

Additional Information
