

Coil Removal Tool - for BMW Motorcycles

This tool has been designed specifically for removing the ignition coil on BMW motorcycles. Intended as an alternative to the plastic tool supplied by BMW, this CNC machined aluminium Stick Coil remover fits securely onto the coil cap allowing you to safely pull the Stick Coil out whilst reducing the chance of damage to either the coil or the surrounding components.

Additional Information

- Designed for BMW R1150 and R1200 twin plugged boxer engines.
- Manufactured from lightweight aluminium.
- Lightweight for carrying on board.
- Ignition coil remover/puller
- Helps prevent damage.
