

TPMS Torque Driver & Tool Set 10pc

For vehicles fitted with Tyre Pressure Monitoring Systems (TPMS) that rely on sensors attached to the inside of the tyre valve. Designed to remove the valve/sensor unit and dismantle/reassemble in the correct way ensuring that delicate valve components do not get overtightened.

Additional Information

- Kit includes : 2 x 1/4"D adjustable torque drivers: 0.4 - 2Nm & 2 - 10Nm, 1/4"D T-handle.
- 1/4"D deep sockets: 11 & 12mm x 100mm x 1/4"D extension bar, 3 x 1/4"D bits, T10, T20 & valve stem.
- TPMS grommet tool x 190mm long (composite).
- Low torque driver can also be used for tightening other low torque components eg airbags, interior panels, plastic fairings etc.
