

Wheel Bearing Supports

Universal dummy drive shaft wheel bearing supports

Additional Information

- Simple to install - simply put in place of drive shaft through the wheel drive flange. Holds the bearing and drive flange together to prevent damage.
- Two dummy drive shafts to allow most light vehicles to be placed back on their wheels and manoeuvred without their drive shafts during prolonged front end work.
- Particularly useful where gearbox and engine units are removed for service or repair and the vehicle needs to be moved to free off ramps and workshop space.
- Made in Sheffield.
- DO NOT TOW VEHICLE ON PUBLIC HIGHWAY USING THIS PRODUCT. Beware of ABS sensors on modern vehicles.
