

Wärmeinduktor (UK-Stecker)

The Laser 5834 uses induction technology to create flameless heat, which accurately concentrates the heat into the area you are working on only heating the metal or treated plastics. The key benefit of this is that it minimises the risk of collateral damage and reduces 'cool off' periods saving the workshop time and money. Has different coil types to help in virtually any difficult to reach area; no need for specialist training; complete with an ergonomically designed 'pistol grip' handle for ease of use and a bright LED mounted at the business end to illuminate the work area. It is manufactured in the UK for 230V European mains power operation meaning no conversions from a US 110V model as some tools are.

Additional Information

- Induktionsheizgeräteset
- Lieferung mit einer Spule (22 mm Spule, 19 mm Spule oder universelle Seilspule)
- Induktionstechnik dank flammenloser Wärme ideal für Spurstangenköpfe, Auspuffteile und für alle festsitzenden Muttern und Schrauben
- Zum Einsatz in Karosseriewerkstatt bei Verwendung mit Minikissen-Set (separat erhältlich Teilnr. ????)
- Hergestellt in Großbritannien
