

Vibration Damper Brace - BMW

Part of the Laser range of Engine Timing Tools for BMW

Additional Information

- Special crankshaft tool for the BMW N47 and N57 (1.6 and 2.0) engines and late Mini engines 2007-2016
- Designed to hold the crankshaft pulley stationary while loosening or tightening the centre bolts of the crankshaft. The tool locks onto the inner part of the pulley/damper to prevent damage to the vibration dampening element (the rubber ring) that separates the outer and inner portions of the pulley as well as prevent the engine from turning
- This product is linked to the Laser timing tool kits Part No. 5196 and 6301
- OEM 11 7 220
- Made in Sheffield
