

Injector Sleeve Remover/Installer - for Volvo (FM)

A specially designed kit that allows the copper unit injector sleeves to be extracted from the top of the cylinder head on the engine.

Additional Information

- Applications: Volvo FM truck engines.
- The kit utilises an expanding collet design to grip the sleeve from above and attaches to the puller force screw.
- Equivalent to OEM 9986174, 88800387, 9998254.
- Fitting tool expander supplied for copper type sleeves only
- Steel sleeve installer kit available separately - please see Laser Part No. 6817.
