

## Brake Fluid Boiling Point Tester

The Laser Brake Fluid Boiling Point Tester performs a boil test on a sample of fluid taken from the vehicle system and gives a clear indication of the boiling temperature and a clear indication of the serviceability of the fluid.

### Additional Information

- Identifies the boiling point of any brake fluid sample.
- Powered from the vehicles own battery.
- Clear accurate digital read out.
- Accuracy and calibration of the device can be easily serviced by testing the boiling point of clean water; if it boils at 100°C, then the tester is 100% accurate.
- Sampling syringe & glass sampling container included.
