

AdBlue-Einfülltrichter

Designed to screw directly on to the AdBlue® tank filler neck where the tank is fitted with a vertically accessed filler (e.g. under boot floors or under-bonnet areas etc.). The funnel valve allows the user to stop the filling process even when there is fluid still in the funnel to help avoid over filling the tank.

Additional Information

- Absperrventil bei vollem Tank
- Mit Abdeckung zum Schutz vor Staub und Schmutz
- Transparente Füllstandsanzeige
- Entlüftung
- Absperrventil bei vollem Tank
