

Coolant Cap Wrench - for Ford, JLR, Mazda & Volvo

Specially developed for applications where the coolant tank is housed under the bulkhead in a confined area making access for removal by hand difficult.

Additional Information

- Applications: Ford, Land Rover, Mazda and Volvo.
- Constant heating and cooling in use makes the seals of the cap stick further adding to the removal issue.
- 3/8" Drive.
- 60mm across the flats. 6 indents, 8mm wide.
- Manufactured from hot rolling steel (SS41), with a black phosphate finish.
