

Tyre Lever 535mm

The 7183 is a 535mm long Chrome Vanadium steel tyre lever equipped with a plastic protective sliding sleeve designed to help protect polished steel and alloy rims used on cars and motorcycles. All edges are rounded to prevent tyre damage while the plastic protector protects the rim making the tool ideal for use on run-flat and low profile tyres

Additional Information

- 535mm long with full rounded edges to provide excellent leverage while protecting the tyre from damage.
- Manufactured from drop forge Chrome Vanadium steel for strength.
- Sliding protector designed to be slide up the lever to protect the wheel rim.
- Ideal for use on alloy or steel rims, also low profile and run flat tyres.
