

Roller Cabinet 10 Drawer

A unique solution for modern workshops, this 10 drawer roller cabinet is essentially a mobile workstation. It can be manoeuvred to a desired location in the workshop for quick access to tools or fixings. The cabinet top provides a work bench allowing parts & components to be placed on top while work or maintenance is undertaken, with the ability to mount a vice to the top surface making it a fully functional work top. The roller cabinet features 40kg drawer loading capacity, auto closing drawers with ball bearing slides, lockable cupboard with adjustable shelves, accessory hanging panel and TPR swivel castors with brake to enable the cabinet to be easily located close to where tools are needed. Ideal for both specialist and general tool storage for any workshop, garage or workstation.
