

Wire Insertion Tool Set

An essential tool for directing wires through obstacles and barriers without damage to the insulation. Manufactured from low carbon steel, with a Polypropylene (PP) & Thermoplastic rubber (TPR) handle.

Additional Information

- A four piece tube set with screwdriver handle attachment to cover a wide range of lengths and diameters of sheathed wires.
- Also ideal to protect endoscopes from damage when inserting into tight areas.
- Radius ended tubes allows wiring to be pulled through without damage.
- Angular tube ends also stop wires from bending when in contact with solid obstacles or metal surfaces.
- Perfect for use when installing or repairing stereos, dashboard wiring, headlights and lighting etc.
