

Wheel Hub & Bearing Master Kit

Designed to extract and install the drive flange and wheel bearing on front and rear wheel drive vehicles where a one piece bearing is used. Use on driven axles only.

Additional Information

- Front and rear drive flange and wheel bearing removal.
- Front wheel drive applications include: Chrysler, Ford, Honda, Hyundai, Infiniti, Kia, Lexus, Mazda, Nissan, Toyota and VAG.
- Rear wheel drive applications include: BMW, Mercedes-Benz and Porsche.
- Not suitable for fitting GEN2 bearing assemblies.
- The 7879 utilises a mechanical force screw - always apply molybdenum disulfide grease before use.
