

Auto Darkening Welding Helmet with Respirator

The auto darkening welding helmet is designed to protect from sparks generated from standard welding conditions and also includes UV/IR protection (DIN16) to provide additional protection. The inclusion of a respirator provides greater respiratory protection against fumes, particles and dust.

Additional Information

- Dark shade: DIN 5- 9 and 9-13. Dark to clear delay time: 0.1 – 0.8 sec. Clear to dark switching time: 1/10000 sec. Clear state: DIN 4.
- Suitable for MIG, TIG and arc welding. Includes grinding and cutting functions.
- Helmet power: solar cells and lithium battery 600mAh. Includes low battery and self-check function. Automatic power on/off. Respirator power: battery capacity 6000mAh, powered from Lithium-ion battery. Includes low battery indicator.
- Cartridge size: 133 x 114 x 10mm; viewing area: 100 x 83mm.
- Respirator: filtration efficiency - 99.97%; filtration precision - 0.3µm; switchable air flow - 340L/min, 370L/min and 400L/min. Replacement filters available - please see Laser Part No. 7928; spare filter sponge, Part No. 61521; spare lens cover, Part No. 61488; spare battery and Part No. 61679. CE & RoHS compliant.
