

LTR Cable Puller Pliers

Ideal for use when fitting or adjusting brake cables, these cable pullers act as an extra pair of hands to grip and hold a cable in position whilst the pinch bolt is being tightened. The thumb lock allows for one-handed operation, helping to ensure the cable is tensioned correctly first time, minimising any potential damage caused to the cable by having to repeatedly clamp and readjust it.

Additional Information

- Brake cable tensioning tool, allows the cable to be held in position while the brake cable pinch bolt is being tightened.
- Suitable for use on cable operated caliper, cantilever, disc and V-brakes.
- Thumb lock for one-handed operation.
- Comfort grip for ease of use.
