Camshaft Locking Tool

OEM Ref.

3418, MP 1 312, T10098, T20038

**EU REGISTERED
DESIGN**

WARNING NOTICE

It is always recommended to refer to the vehicle manufactures workshop manuals for specific procedures and technical data when using these tools.

Incorrect or out of phase engine timing can result in damage to the valves. It is always recommended to turn the engine slowly, by hand and to recheck the camshaft and crankshaft timing positions.

We cannot consider a warranty claim for tool failure if you have used the kit incorrectly or if you use it for any other purpose than that for which it is intended. Nor can we be held responsible in any way for personal injury caused whilst using this kit. Laser cannot be held responsible for damage caused to any vehicle whilst using these tools.

IMPORTANT: Always wear eye and hand protection when using this tool.

Always refer to the website for most up to date applications: www.lasertools.co.uk/product/3327

This revised Camshaft Setting Bracket for VW's now gives even better alignment with 2 ground shoulder screws included in the set.

This time saving product from Laser means essential timing adjustment can take place with the Vacuum Pump and Cam cover still in place. The Camshaft setting bracket can be offered to the camshaft slot by sliding it along the dowel screws. An additional knob/handle is incorporated in the tool to assist with precision alignment.
