5126

Diesel Injector Alignment Tool Kit | Ford

Description:

The 5126 consists of 2 machined bars (one adjustable) which fit onto the injectors in such a way as to hold them in the correct position why the injector is tightened down.

A: OEM 303-678 = solid metal bar with 2 machines slots allowing 2 injectors to be aligned at the same time.

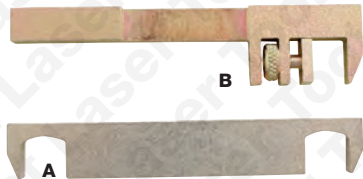

B: OEM303-711 = adjustable clamp.

Applications:

Mondeo (2000 to 2007) | Transit (2000 to 2006)

Engines: Duratorq Di | TDCi | TDDi 2.0 | 2.2 | 2.4

Above engines may also be referred to as "Puma" engines.
