

**Warning**

It is always recommended to refer to the vehicle manufacturers workshop manual for specific procedures and technical data when using these tools.

Incorrect or out of phase engine timing can result in damage to valves.

It is always recommended to turn the engine slowly by hand and to recheck the camshaft and crankshaft timing positions.

Our application directory should be used as a guide only and The Tool Connection cannot be held responsible for any damage caused to your engine by using these tools.

**Safety**

Care should be taken when working on the engine and full protection should be worn.

The Tool Connection cannot be held responsible for any personal injury caused when using these tools.

**Replacement parts** can be ordered direct from The Tool Connection and not through your distributor.

## Tension Pre-Setting Tool

[www.lasertools.co.uk](http://www.lasertools.co.uk)

This set of tools enables the correct engine timing to be made when servicing the Renault 1.9 F9Q 750/754 & 2.2/2.5 DCi G9 engines.

This tool enables the correct pre-tension to be applied to the timing belt. This tool has 3 interchangeable covers and a spacing washer to suit the variety of tensioner used.

Always refer to the vehicle manufacturer's service manual or a suitable proprietary instruction book.
